

Name: _____

It's okay to make mistakes! In fact, many items we have today come from the failed experiments of scientists. How often do you use one of these products in your daily life? Let's find out!

Your task:

- 1. Find a product that was a result of a failed experiment.**
- 2. Determine what questions you would like answered about the product/failed experiment.**
 - **Example: What was the outcome of the original experiment supposed to be?**
- 3. Research, research, research.**
 - **Make sure you are citing your work and using reliable sources (you may want to turn in a separate Works Cited page).**
 - **Make sure you are taking notes in an organized way (using Cornell Notes)**
- 4. Plan a way to share your findings.**
 - **Posters, diagrams, story, videos, song, skit, etc.**
- 5. Share out!**

Cornell Notes	<p>My notebook is organized and it is easy to follow. My notes are titled and have a learning target included. My table of contents is completely filled out and my pages are numbered.</p> <p>My notes reflect the Cornell Note style. The left side of my notes is for questions and headings.</p> <p>I've recorded my answers thoroughly on the right side of my notes. I rephrase the information I learned instead of copying it. I answered all questions and provided extra information from my research.</p> <p>I've included a summary at the end of my notes.</p>	<p>My notebook is organized and it is easy to follow. My table of contents is somewhat filled out and my pages are numbered.</p> <p>My notes reflect the Cornell Note style. The left side of my notes is for questions and headings.</p> <p>I've recorded some of my answers on the right side of my notes. Not all questions are answered. I copied information directly from my site instead of rephrasing it.</p> <p>I've included a summary at the end of my notes.</p>	<p>My notebook is not organized. My notes are titled. My table of contents is not filled out.</p> <p>My notes do not reflect the Cornell Note style.</p> <p>I've recorded a few of my answers on the right side of my notes. Most questions are answered. I copied information directly from my site instead of rephrasing it.</p> <p>I did not include a summary.</p>
Presentation	<p>I presented my product in a creative way. It is visible that I put time and effort into my project. I used eye contact and remained respectful throughout my presentation.</p>	<p>I presented my product in a creative way. It is visible that I put time and effort into my project.
